Lower Mill House, Staveley
Mill Yard, Staveley, LA8
9LR. Tel: 01539 822140 or
822439

The Spring 2011 Cumbria Woodland forum will provide the opportunity for you to hear the latest information on *Phytophthora ramorum*, its current extent, progress with control and why large areas of infected larch in South West England and Wales need to be felled as soon as possible. Our speakers will explain the Plant Health legislation and share their predictions for the potential impact of the disease in the North West in the future. Woodland officers will also be present to advise on site-specific management issues.

Cumbria Woodland Forum
