

COMPLETING RISK ASSESSMENT

The risk assessment needs to show that you have examined the hazards in your proposal and have taken sufficient precautions to ensure that these are minimised to an acceptable level. A typical format is attached for your information but you should adjust to your own particular circumstances.

Please ensure that you have included adequate consideration of participants, spectators, staff, contractors, including Forestry Commission staff and contractors, the general public and other forest users.

You should carefully consider the forest environment, its wildlife and hazards, vehicles and equipment you and others may be using, peoples varying abilities, health, safety and emergency procedures.

You can seek further advice from The Health and Safety Executive.
