

You need each part of your body to be working well to keep fit and healthy. In the same way a tree needs each of its parts to do special jobs to keep it in good condition. Remember, trees are the largest living plants in the world!

CROWN

branches

leaves

flowers

seeds

TRUNK

bark

wood

ROOTS

anchoring roots

feeding roots

Use some reference books about trees to find out about the different tree parts listed below. Write notes in the spaces about each part's special job in keeping a tree healthy.
