

LIST OF POSTERS

Poster Session sponsored by Scottish Enterprise

Wood Properties

Effects of pre-commercial thinning on juvenile wood in Scots pine
Nils Eliasson *et al.*

Influence of thinning intensity on wood properties in Norway spruce
Tuula Jaakkola *et al.*

Soil chemistry and tree ring element concentrations in Scots pine
Johan Lindeberg

Decay resistance of Scots pine from northern Finland
Seppo Nevalainen

Tracheid dimensions of Norway spruce in two fertilisation experiments
Riikka Piispanen *et al.*

Heartwood in maritime pine (*Pinus pinaster* Ait.) and potentialities for solid wood products
Isabel Pinto *et al.*

Natural variation and the effect of modification of lignin on wood properties in Norway spruce
Sanni Raiskila *et al.*

Wood of less-known indigenous tree species: bird cherry
Ales Zeilder

Quality in Standing Timber

External knot characteristics in black spruce from three initial spacings
Jeff Benjamin *et al.*

Modelling compression wood using external log geometry data
Jacob Edlund and Mats Warensjö

Measuring conifer stem form as an assessment of timber quality
Barry Gardiner *et al.*

National Inventory of Woodland and Trees
Justin Gilbert

Biomass allocation and tree structure in Norway spruce of different competitive status
Anu Kantola

Stem reconstruction models and simulation programmes: tools to evaluate potential wood production in young cork oaks
Sofia Knapic *et al.*

Dynamics of movement and mechanical characteristics of Sitka spruce stems
Ronald Milne *et al.*

Finite element model of growth stresses
Sigurdur Ormarsson and Marie Johansson

Assessing stocking density for even-aged mature spruce stands using digital aerial photography
Juan Suarez *et al.*

Effects of stand height and stem number after pre-commercial thinning on stem form and branch characteristics for *Pinus sylvestris*
Kristina Ulvcrona *et al.*

Laboratory and Industrial Processes

Stress lamination of timber
G. Freedman *et al.*

Pre-sorting and pre-twisting of logs to improve straightness in sawn timber
Marie Johansson and Robert Kliger

Modulus of elasticity variation of Scots pine timber trees in central Sweden
Håkan Lindstrom *et al.*

Identification of compression wood in Sitka spruce and Scots pine
Elspeith Macdonald *et al.*

Simultaneous localisation of organic compounds in wood by FTIR microscopy
Annette Naumann *et al.*

Industrial methods of measuring heartwood in logs and sawn wood
Johan Oja and Stig Grundberg

Compression wood in UK-grown Sitka spruce
T. Reynolds *et al.*

A scanner-based solution for nail fouling in timber frame panel manufacture
Tim Reynolds

LIST OF POSTERSPoster Session sponsored by Scottish Enterprise

Laboratory and Industrial Processes (*continued*)

Industrial testing of cork oak wood in veneer
Javier Vázquez *et al.*

Drying and Distortion

Single studs in torsional restraint: effect on twist in timber
Magnus Bäckström and Robert Kliger

Linseed oil dispergation within Norway spruce year rings after Linotech impregnation
Thomas Ulvcrona *et al.*

Effects of oscillating drying conditions
Johannes Welling and Torsten Riehl

Climate Change Impacts

Climate change effects on wood properties of aspen and birch
Seija Kaakinen *et al.*

Growth and wood properties of Scots pine grown at elevated temperature and CO₂ concentration
Antti Kilpeläinen *et al.*

Impact of elevated CO₂ concentration and temperature increase on growth and vessels/parenchyma content in juvenile beech stem wood
D. Overdieck *et al.*

Aspects of timber quality modelled by macro allocation and management
Tim Randle *et al.*

Contribution of environmental factors to perceived quality of wood
Ritva Toivonen *et al.*

The Forestry Woodchain

Forecasting the quantity and quality of the British timber supply
Justin Gilbert *et al.*

Stem bank database: a tool for analysis in the forestry woodchain
Anders Gronlund *et al.*

Finnish Centre of Expertise for Wood Products: diversification of wood utilisation
Jari Kärnä

Product-oriented fibre utilisation in the forest to paper woodchain
Sven-Olof Lundqvist *et al.*

Compression wood in conifers
Elspeth Macdonald *et al.*

The Effect of Windblow on Timber Quality in Sitka spruce
Shaun Mochan

Grading and Forecasting

Impact of precommercial thinning on clear-wood properties of naturally regenerated balsam fir
Alexix Achim *et al.*

Modelling compression wood using external log geometry data
Jacob Edlund and Mats Warensjö

Lodgepole pine values related to site, stand and tree characteristics
G. R. Middleton and B.D. Munro

Visual tree grading system for estimating sawing quality in mature *Pinus pinaster*
Jérôme Moreau and Guillaume Chantre

Timber assortments and selected aesthetic wood properties of Nordic Scots pine
Mika Reikkinen *et al.*

Spiral grain in Norway spruce and prediction of twist in sawn timber
Harald Säll

The effect of site on the quality of sawn timber of Scots pine
Marketta Sipi and Timo Hemmilä

Yield of saw timber from thinnings on drained peatlands
Reeta Stod *et al.*
