

We asked our engineers to design a self-regenerating product that would help to combat climate change, alleviate flooding, re-oxygenate the air, stabilise the soil, reduce noise, produce food, fuel, and wood for homes and paper, provide homes and shelter for people and animals, places for children to play...

... this is what they came up with.

CLIENT: H.SAPIENS
JOB NO: 0001
SPECIFICATION:
SELF-REGENERATING, MULTI-PURPOSE STRUCTURE FOR SUPPORTING QUALITY OF LIFE ON EARTH.
WORKING TITLE: TREE
