## INTRODUCTION

This survey was mainly conducted around the two car parks at the base of the valley, close to the Cwmcarn Visitor Centre, with a handful of interviews taking place at Car Park 3.

This information acts as a yardstick to measure our progress so far and what aspects of recreation provision could potentially be improved in the future. So, in carrying out such surveys, visitors themselves act as our guides to how we invest our resources.

The Drive has a number of facilities, some of which have been enhanced since our previous visitor survey in 2002 for example all the sculptures at car park 3 and 5 have been completed and installed.

The now world-renowned Mountain Bike Trail, stretching for 15km around the hillsides of Cwmcarn, is continuing to attract large numbers of bikers and will be enhanced in the later part of 2004 with the addition of a purpose built downhill track.

This survey will be used to feed into the current Cwmcarn Development Plan which has been jointly commissioned by the Forestry Commission and Caerphilly Council. This plan will map out the way forward for Cwmcarn for the next five years and surveys like this one will be essential in the monitoring and evaluation of the plan.

We hope that you will find the views expressed in this 2003 survey both informative and inspirational. Should you wish to discuss the contents of any part of this document, please contact:
