

UK Forestry Standard and Woodland Management Plan Workshops

The ICF in partnership with Forestry Commission England (FCE) are hosting a series of one day practical workshops to improve your FCE Management Plans.

These workshops provide an introduction to the UK Forestry Standard (UKFS) and revised Forestry Commission England woodland management plan templates. The woodland management plan aims to bring more woodlands into management, ensure compliance with UKFS and link in with England's next Rural Development Programme. The workshops incorporate practical advice on using the templates to improve your plans, whilst offering a better understanding of the FCE's approval process, and are particularly valuable for forestry practitioners, agents and woodland owners.

Tickets cost £30 (including refreshments and lunch). Advance booking is essential, for more information and to book please visit: www.charteredforesters.org/fceplans
