

Pre-Release Access to Official Statistics in Final Form

Introduction

The Forestry Commission's arrangements for pre-release access to Official Statistics are described in a Pre-Release Access Statement¹. This document supplements the statement by giving the names and/or job titles of all those persons to whom pre-release access has been granted to Official Statistics in their final form for briefing purposes, and the organisations to which they belong. The justification for giving advance access to each listed recipient will be available on request.

Conditions of access

Those persons who are given access to the Forestry Commission's Official Statistics ahead of their release must keep the statistics secure and under embargo, and they must abide by the following conditions of access. They must avoid:

- disclosing the statistics or any part of a publication containing those statistics to any person not listed as a pre-release recipient;
- providing any indication of the size or direction of any trend revealed by the statistics;
- using such access for personal gain, or taking any action for political advantage;
- exploiting such access to change or compromise the content, presentation, or timing of publication of official statistics.

Access to Forestry Commission Official Statistics

For each set of statistics, the data owner will agree in advance whether pre-release access for certain officials or Ministers would be appropriate, and if so follow the procedures in the Pre-Release Access Statement.

Sheila Ward

Forestry Commission Lead Official for Statistics
