15th March 08

As part of the 2008 Festival of Science, we are interested in *your* view on woodland landscapes.

What is it that *you* like about woodland landscapes?

Woods are increasingly important for people, wildlife and timber production. How well do our woods manage to provide for these uses?

If you have 20 minutes to spare please join us at The Hub where you will be able to choose between different woodland landscapes shown on our Virtual Landscape Theatre

You will also have the opportunity to watch and comment on two films on landscape and water research.
