Light blue cells are requested only for EU members using the Combined Nomenclature to fill in - other countries are welcome to do so if their trade classification nomenclature permits

"ex" codes indicate that only part of that trade classification code is used

Please note that information on tropical species trade is requested in questionnaire ITTO2 for ITTO member countries

+++ denotes data not available.

1 Please enter current import tariff rates applied to tropical and non-tropical timber products. If available, please provide tariffs by the relevant customs classification category. If tariff levels have been reported in previous years, enter changes only. (Logs = JQ code 1.2, Sawn = JQ code 5, Veneer = JQ code 6.1, and Plywood = JQ code 6.2)

Current import tariff	Logs	Tropical:		Sawn	Tropical:		Veneer	Tropical:		Plywood	Tropical:	
		Non-Tropical:			Non-Tropical:			Non-Tropical:				
Comments (if any):												

2 Please comment on any quotas, incentives, disincentives, tariff/non-tariff barriers or other related factors which now or in future will significantly affect your production and trade of tropical timber products.

3 Please elaborate on any short or medium term plans for expanding capacity for (further) processing of tropical timber products in your country.

4 Please indicate any trends or changes expected in the species composition of your trade. How important are lesser-used tropical timber species and/or minor tropical forest products?

5 Please indicate trends in domestic building activity, housing starts, mortgage/interest rates, substitution of non-tropical wood and/or non-wood products for tropical timbers, and any other domestic factors having a significant impact on tropical timber consumption in your country.

6 Please indicate the extent of foreign involvement in your timber sector (e.g. number and nationalities of concessionaires/mill (joint) owners, area of forest allocated, scale of investment, etc.).

7 Please provide details of any relevant forest law enforcement activities (e.g. legislation, fines, arrests, etc.) in your country in the past year.

8 Please indicate the current extent of forest plantations in your country (ha), annual establishment rate (ha/yr) and proportion of industrial roundwood production from plantations.

Codes for JQ2 and EU1 for EU and EFTA countries

10.3.4	OTHER PAPERS MAINLY FOR PACKAGING		48.05.93
10.4	OTHER PAPER AND PAPERBOARD N.E.S		48.02.40 48.04.41 48.05.40/50 48.06.30 48.12/13

HS: The Harmonised Commodity Description and Coding Systems, a multipurpose international product nomenclature developed by the World Customs Organization (WCO), comprises up to six digits and is updated every 4 – 6 years.

CN: The Combined Nomenclature of the EU is identical to the HS on the first six digits and comprises two extra digits, making it more detailed than the HS. It is updated and published every year.

How to interpret the notation: The dots are used for readability and have no meaning. A code ending in "0" means that all subcodes are to be included, e.g. 47.03.10 includes subcodes 47.03.11 and 47.03.19. If only 4 digits are indicated, all subcodes are included, e.g. 47.06 includes 47.06.10, 47.06.20, 47.06.30, and 47.06.90. Code numbers separated by "/" mean that all the following codes ending in the digits indicated (and

The term "ex" means that only part of the data available under a code is usable because the code encompasses a wider product range. For instance, "ex44.07.99" under "Sawnwood - of which tropical" means that only part of the data under HS-code 44.07.99 is usable, because insufficient detail is available. However, the table shows that CN code 440799.96 is sufficiently detailed to identify "Sawnwood - of which tropical". In case even the CN is not detailed enough, bold print is used in the CN column. Many tropical timber products contain "ex" codes in the above list, since the HS explicitly recognises less than 100 tropical timber species. Species not explicitly recognised as tropical are grouped in "other" categories with non-tropical, non-coniferous timbers that are likewise not explicitly recognised by the HS (e.g. 44.07.99). Estimates of tropical timber trade totals therefore require that these "other" categories be analysed to ascertain how much of the total was sourced from tropical countries. This can only be done at country level; Eurostat must extract foreign trade

Codes for JQ3 for EU and EFTA countries

12.7.3	Other printed products		49.03/04/05/06/07/08/09/10/11

HS: The Harmonised Commodity Description and Coding Systems, a multipurpose international product nomenclature developed by the World Customs Organization (WCO), comprises up to six digits and is updated every 4 – 6 years.

CN: The Combined Nomenclature of the EU is identical to the HS on the first six digits and comprises two extra digits, making it more detailed than the HS. It is updated and published every

How to interpret the notation: The dots are used for readability and have no meaning. A code ending in "0" means that all subcodes are to be included, e.g. 49.00 includes all codes from 49.01 to 49.11. If only 4 digits are indicated, all subcodes are included, e.g. 48.18 includes 48.18.10, 48.18.20, 48.18.30, 48.18.40, 48.18.50 and 48.18.90. Code numbers separated by "/" mean that all the following codes ending in the digits indicated (and their subcodes) are to be included.

The term "ex" means that only part of the data available under a code is usable because the code encompasses a wider product range. For instance, "ex94.06" under "Prefabricated buildings - of which made of wood" means that only part of the data under HS-code 94.06 is usable, since mobile homes and prefabricated buildings of wood, iron or steel are all lumped together under that code. However, the table shows that the CN classification covers sufficient detail to identify "Prefabricated buildings of wood". In case even the CN is not detailed enough, bold print is used in the CN column. Many tropical timber products contain "ex" codes in the above list, since the HS explicitly recognises less than 100 tropical timber species. Species not explicitly recognised as tropical are grouped in "other" categories with non-tropical, non-coniferous timbers that are likewise not explicitly recognised by the HS. Estimates of tropical timber trade totals therefore require that these "other" categories be analysed to ascertain how much of the total was sourced from tropical countries. This can only be done at country level; Eurostat must extract foreign trade data for all countries.
