

Looking for leaves

Look for leaf shapes

Leaves come in all sorts of colours, shapes and sizes. Some have hidden scents, some make wonderful sounds and there are many different textures to explore.

Crunch!

Rustle!

Tickle!

- Find leaves that feel tickly or prickly, waxy or hairy, rough or smooth.

- Make a leaf pile, put your feet into it and rustle or stomp to create leaf music.

- Lay some leaves in a line on the floor to create a leaf-snake winding through the trees.
- Watch the leaves dance as they fall to the floor.

- Stop still and listen to the wind in the tree tops.

- Find a Douglas fir, rub the leaves and smell the hidden citrus scent.

Match as many of these autumn leaf colours as you can!
