INTRODUCTION TO
THE NEW FOREST

WHERE IS THE NEW FOREST?

This 375 sq. km. area is in south-west Hampshire, lying to the west of Southampton Water and between the two conurbation’s of Southampton and Bournemouth. Its southern edge comes to the shores of the Solent between Lymington and Calshot spit. To the west the River Avon forms a distinct boundary and to the north the land gradually rises to the edge of the chalk forming the Hampshire Basin. It is easily accessible by the M3 and M27 motorways which lead on to the A31 trunk road to the west country. The main London to Weymouth railway also crosses the New Forest.

WHAT IS THE NEW FOREST?

It certainly isn’t new and it isn’t by any means all forest! It has been described as a unique survival of medieval Britain and in many people’s minds it is a ‘natural’ area but this is only partly true. What most people think of as the New Forest is a unique landscape. It is a pleasing mixture of heathland, imposing ancient woodland, wetlands, grassy plains and inclosures of both coniferous and deciduous trees set in a gently undulating lowland landscape. Access to the vast majority of this land is open and free because it is crown land. The enjoyment of this landscape is further enhanced by the presence of grazing animals, notably ponies, cattle and in the quieter areas, deer.

NEW FOREST AREA BOUNDARIES (refer to map)

**Perambulation**
This is an historic term for the boundary of the area governed by Forest law. It is defined in the New Forest Act 1964 and encompasses Crown land (managed by the Forestry Commission), privately owned land and manorial wastes subject to common rights, and privately owned enclosed land. The area within the perambulation makes up the heart of the New Forest.

**New Forest Heritage Area**
The area which has planning policies as if it were a National Park. The boundary is defined through the local plan process. It extends beyond the perambulation, but does not include the Avon Valley, a number of coastal areas on Southampton Water and Lower Test Valley, or the towns of Ringwood and Lymington.

**New Forest National Park Designation Order boundary**
The area which has been designated to be included in the New Forest National Park.
FACTS AND FIGURES

Areas:
Land within the perambulation: 38,000 ha
Land managed by the Forestry Commission (Crown Land) 25,825 ha
Inclosures 8,500 ha
Open Forest 17,325 ha
Land within Heritage Area boundary 53,320 ha
Land within the New Forest District Council boundary 75,100 ha
(Figures from NFDC 2001)

Population:
People living within the Heritage Area approx 38,506
People living within New Forest District Council boundary approx 172,735
(Figures from NFDC 2001)

Commoning:
Animals depastured in the New Forest:

Recreation:
Total visitors per annum 20 million
- 12 million local resident day visitors
- 8 million day visitors
Camper nights (2001) 650,000 camper nights

Estimated that 95% of visitors travel to the New Forest by car. Includes 81% of local residents.

Conservation:
National and International Conservation designations:
- Site of Special Scientific Interest (1959)
- Special Protection Area (1993)
- RAMSAR Site (1993)
- Proposed as Special Area of Conservation (1995)
- Proposed National Park (1999)
