Colette McAleer

☎ 01698 368530

There will be no charge for this  
event.

Tea, coffee will be provided on  
arrival.

This seminar will provide the opportunity for you to hear about the current *Phytophthora lateralis* infection of Lawson's cypress at Balloch Castle Country Park. Speakers will explain the current situation, the science of the disease, the relevant Plant Health legislation and the bio security requirements. A brief overview of *Phytophthora ramorum* and *Phytophthora kernoviae* will also be given.
