

Habitat Survey

There are 3 different habitats for you to study. If you study them all you'll need 3 sheets. On each sheet circle the coloured box for the area you're studying.

**Clearing/
Area without
trees**

**Deciduous
Woodland**

**Coniferous
Woodland**

1. Darkness quotient

Circle the number below to indicate how dark or light you think the habitat is.

1 = very dark , 10 = nothing overhead and very light

1	2	3	4	5	6	7	8	9	10
Very Dark		Quite shady		Some shade		Not many shadows		Quite light	Bright sunshine

2. What's on the ground?

Colour in or tick the correct boxes below.

Deciduous leaves	A few small plants	No plants	Lots of different plants	Nothing, but earth
Pine needles	Grass	Low growing plants	Dead wood	Fungi

3. Variety of plant life

How many different types of tree are there?

How many different types of plant are there?

4. Variety of Animal Life

Which of the following do you think your area would be home to? Colour in or tick the correct box.

Some animals	Lots of animals	Not many animals
---------------------	------------------------	-------------------------

5. Biodiversity

This means a variety of living things found together in a habitat. Which of the following describes this area? Circle the correct answer.

Not much biodiversity	Some biodiversity	Lots of biodiversity
------------------------------	--------------------------	-----------------------------
