

Programme

The workshop will provide an update for current and potential project sponsors on the research that has been carried out within the SIRT project. Speakers from Edinburgh Napier University, Forest Research and the University of Glasgow will cover the following topics:

- Benchmarking the variation in the wood properties of Sitka spruce
- Use of acoustic NDT tools to segregate trees and logs early in the supply chain
- Timber grading
- Links between wood structure and timber performance
- Synthesis of knowledge on Sitka spruce wood properties
- Research into the wood properties of other species

There will also be an opportunity to discuss the current research and the future research strategy

Registration

There is no charge for the workshop. For catering purposes, can you please register via email with Evelyn Hall (evelyn.hall@forestry.gsi.gov.uk)
