Reporting Form 1.3b: Diameter distribution

Pan-European indicator 1.3: Age structure and/or diameter distribution of forest and other wooded land, classified by forest type and by availability for wood supply.

Related SoEF definitions: Forest, Forest available for wood supply, Stand, Uneven-aged stands.

Reporting notes:

- | |
|---|
| 1. Diameter classes refer to diameter at breast height (d.b.h.) measured (cm over bark) at a height of 1.3 m above ground. |
| 2. If country has different diameter classes in the national reporting system, please re-group accordingly with a sufficient explanation. |
| 3. If data is only available for the class " <i>Forest available for wood supply</i> ", please provide data for this class and provide the information under " <i>Country comments</i> ". |
| 4. The upper limits of classes are inclusive, i.e. in the diameter class ≤ 20 - the 20cm diameter is included, in the diameter class 21-40cm – the 40 cm diameter is included in this class, etc. |
| 5. The set of pilot Tables with the explanatory notes and guidance for voluntary reporting on Indicators 1.3, 4.1, 4.3 and 4.5 according to the new " <i>European Forest Types</i> " classification is annexed to this Enquiry. |
