**Reporting notes:**

1. For the estimation of contribution to Gross Domestic Product (GDP), data on Gross Value Added (GVA) should be used. GVA measures the contribution to the economy of each individual producer, industry or sector in the country. The link between GVA and GDP can be defined as:  $GVA + \text{taxes on products} - \text{subsidies on products} = GDP$ .
2. For 2010, please provide data or estimates for the most recent year available, and indicate the year and data status in "Country comments".
3. Data on GVA for each economic activity should be available from the National Accounts prepared by the country's national statistical authority. If a different source is used, please explain in comments.
4. Figures for each year should be converted from national currency to Euro (or ECU for 1990) using average exchange rate for that year (as reported in the table in the introduction).

5. The main sources for value-added are the following:

1) For EU/EFTA countries

a. Eurostat - National accounts

( [http://epp.eurostat.ec.europa.eu/portal/page/portal/national\\_accounts/data/database](http://epp.eurostat.ec.europa.eu/portal/page/portal/national_accounts/data/database) )

b. Eurostat - Annual detailed enterprise statistics - industry and construction

([http://epp.eurostat.ec.europa.eu/portal/page/portal/european\\_business/data/database](http://epp.eurostat.ec.europa.eu/portal/page/portal/european_business/data/database) )

2) For other countries (non-EU):

a. UNIDO International Yearbook of Industrial Statistics (<http://www.unido.org/index.php?id=o3472> )

b. UNdata - National Accounts Official Country Data (<http://data.un.org/Explorer.aspx?d=SNA> )

3) For all countries (in case statistics cannot be found in Eurostat & UNIDO), statistics available from national Statistics Offices should be checked; main links to the list of sources by country are listed in the publications below:
