

Seed Explorer

Look for a rainbow of seed colours as you walk....

Get into the woods and look for nuts, cones and seeds.

Look for and touch these!

Collect and bury 3 nuts like a squirrel, see if you can find them later!

Find an open cone and see if you can shake out any winged seeds!

Leave a trail of seeds for a vole to follow. Where will you lead them? To a waiting store of nuts, to a new burrow, or somewhere else?

Find a nibbled cone and discover what has eaten it:

Squirrel: Scales are gnawed off, eaten cone looks untidy and are found in open spaces

Mouse: Scales are neatly gnawed off, found at hidden feeding sites.

Woodpecker: Scales broken and ruffled
