

Advanced notice of Harvesting operations

Tunstall is a sustainable working forest and plays an important role in supplying the British timber market. Throughout 2016-2018 the Forestry Commission will be harvesting trees which are ready for thinning across this section of Tunstall Forest. During harvesting operations the forest and trails will be closed to the public, however, we would like visitors to be able to use other parts of the forest safely during this time.

This map outlines when areas will be harvested so you can plan ahead and avoid entering the harvesting site.

Be aware that this plan may change due to unforeseen circumstances so always obey warning signs.

To keep updated, visit the Tunstall Forest webpage <http://www.forestry.gov.uk/tunstall> and click on Harvesting Operations.
