Forest Research ([www.forestry.gov.uk/forestresearch](http://www.forestry.gov.uk/forestresearch)) is the research agency of the Forestry Commission. It is a world leader in the research and development of sustainable forestry and is Britain's principal organisation for forestry and tree related research, with specialists covering topics from managing timber, and protecting woodland from climate change, to tracking new pests and diseases, and examining the social and community benefits of woodland in urban and rural areas.

Forest Research publishes reports of research ([www.forestry.gov.uk/fr/publications](http://www.forestry.gov.uk/fr/publications)) and organises, or participates in, a range of events in Scotland at which scientists share knowledge and understanding of key topics ([www.forestry.gov.uk/fr/events](http://www.forestry.gov.uk/fr/events)). It is possible to register your email in order to receive automatic notification when new publications or events are added to our website. You can register by emailing [fr.events@forestry.gsi.gov.uk](mailto:fr.events@forestry.gsi.gov.uk) for events and [newsletter@forestry.gsi.gov.uk](mailto:newsletter@forestry.gsi.gov.uk) for our main newsletter. You can also visit <http://www.forestry.gov.uk/website/publications.nsf/registerinterest> to register for general publications.
