

**We have run several "Green Days" with various Environment Agency regions.**

**Rachel**, organiser from Spalding EA office said:

"I wanted to thank you for organising the event in Bedford Purlieus Wood. We all had a very enjoyable day and got satisfaction from seeing how cutting back the buddleia really opened up the areas. I'm sure most of us will now be taking family and friends to enjoy the woods in the near future so we can share our new found knowledge of the area with them.

We would really like to have another day with you."

**Andy**, organiser from Peterborough EA office said about a ride-bashing day at Fineshade Wood:

"We were all looking forward to getting away from our computers and putting something back into the woodland. It is a great opportunity for hard work as well as team-building, the latter being particularly important, since we've been through a lot of changes in the last 18 months. We shall be back!"

**We have also run days for businesses including Virgin Media.**

Ian, from Virgin Media, after a day clearing vegetation along an overgrown ride in Fineshade said:

"This is the first time a lot of us have done anything like this. It was a beautiful day and we thoroughly enjoyed ourselves, not least because we felt we were doing something constructive. We were amazed by how much we achieved in one day. We now all want your job!"
