The head-board would normally carry the tree symbol and 'Forestry Commission Scotland' (FCS), but this is deemed unnecessary within a Forest Park. In these instances the head-board should carry the tree symbol and park name only. This is in an attempt to both major on 'the place', and minimise sign content (thereby improving readability).

This deviation from the norm would only be used if the park extremities were already marked with fully labeled FCS Threshold signs.

N.B. All distances should be shown in imperial.
