Notes:

1. Areas as at 31 March 2008.
2. FC/FS = Forestry Commission/ Forest Service; Non-FC/FS = all other woodland, including some other publicly owned woodland.
3. Figures for non-FC woodland in Great Britain are based on data obtained from the 1995–1999 National Inventory of Woodland and Trees and adjusted for new planting and sales of FC woodland, but at present no adjustment is made for woodland converted to another land use.
4. Broadleaves include coppice and coppice with standards.

Table 2 Area of certified woodland, 2008

thousands of hectares

	FC/FS	Non-FC/FS	Total woodland area certified
England	202	139	341
Scotland	452	288	740
Wales	106	15	121
Northern Ireland	61	3	64
UK	821	445	1 266

Notes:

1. Areas as at 31 March 2008.
2. FC/FS = Forestry Commission/ Forest Service; Non-FC/FS = all other woodland, including some other publicly owned woodland.
3. All certified woodland is under the Forest Stewardship Council (FSC) scheme.
4. The estimates are based on UK data published by FSC, supplemented by data from individual certificates and other sources. Where possible, figures are for the woodland area certified, rather than the land area certified.
5. The Forestry Commission and Forest Service areas are the latest areas, as shown in Table 1, rather than the areas shown on the certificates.

Notes:

1. New planting figures come from Forestry Commission and Forest Service administrative systems.
2. Areas receiving grant aid are allocated to years by date of payment.
3. Figures include an estimate of areas planted without grant aid.
4. Includes woodland formed by natural colonisation.

Notes:

1. Restocking figures come from Forestry Commission and Forest Service administrative systems.
2. Areas receiving grant aid are allocated to years by date of payment.
3. Figures include an estimate of areas planted without grant aid.
4. Includes woodland formed by natural regeneration.
5. Natural regeneration of broadleaves in non-clearfell systems is likely to be under-reported in this table.

Table 5 Wood production

thousands of green tonnes

Year	Softwood			Hardwood		
	FC/FS	Non-FC/FS	Total	FC/FS	Non-FC/FS	Total
2003	4 817	3 497	8 314	117	445	562
2004	4 894	3 625	8 519	113	399	513
2005	4 579	3 900	8 479	101	492	593
2006	4 582	3 984	8 566	45	392	438
2007	4 653	4 424	9 077	40	400	440
2007–2011	4 778	5 078	9 856
2012–2016	5 447	5 847	11 294
2017–2021	5 620	6 361	11 980
2022–2026	5 048	6 522	11 570

Notes:

1. FC/FS = Forestry Commission and Forest Service; Non-FC/FS = All other woodland, including other publicly owned woodland.
2. One green tonne is equivalent to approximately 0.98 m³ underbark softwood or 0.88 m³ underbark hardwood, and to approximately 1.22 m³ overbark standing softwood or 1.11 m³ overbark standing hardwood.
3. The figures for softwood (conifers) production are based on FC/ FS administrative records and on trends reported by the largest harvesting companies. In any year, they may differ from the estimates of deliveries given in Tables 6a because of variations in the level of stocks between harvesting and delivery to the wood processor. However a persistent difference indicates that statistics for wood production and/ or deliveries may be unreliable.
4. The figures shown for hardwood (broadleaved) production are estimates, based on reported deliveries to wood processing industries and FC/ FS administrative records.
5. The forecasts of future production are annual averages for the five year periods and are taken from the 2005 UK Forecast of Softwood Availability (FC, 2006) (not part of National Statistics).

2007	5590	472	1362	294	200	113	759	8791

Notes:

1. Figures are based on processing industries' purchases of softwood grown in the UK and estimates for woodfuel.
2. Woodfuel is derived from stemwood, and for 2007 includes estimated roundwood use for biomass energy.
3. Other includes shavings and poles.
4. Softwood exports exclude Northern Ireland before 2004.

Forestry Commission's statistical release practices

The Forestry Commission aims to release statistics as soon as they are available. All of our National Statistics publications are available on our website www.forestry.gov.uk/statistics. Release dates are published on our website for the year ahead. Publications are made available at 9.30 am on the day of release. Further details on Forestry Commission statistical release practices are available in our compliance statement, available on our website.

Forestry Commission's statistical revisions policy

Revisions to statistics can occur when further data become available or errors are corrected. The Forestry Commission will normally revise statistics when the figures next appear in any publication. However, if the revision is significant (i.e. resulting in a major change to the published figures), a note showing the revisions will be published as soon as possible on the Forestry Commission website and distributed to all known recipients. In addition, the web versions of any current publications affected will be revised.
