

Appendix 6 Population Impact Schedule

Location	Type of feature, facility or characteristic	Nature of existing feature, facility or characteristic	Value of feature, facility or characteristic	Magnitude of change	Impact during implementation period (significance)	Impact after completion at year 0 (significance)	Impact after completion at year 40 (significance)
Henhurst	Setting	Open, agricultural landscape with large fields and few features	High	Low – implementation period Moderate – Year 0 High – Year 40	Implementation works will be similar in character and scale as the existing agricultural activities NEUTRAL IMPACT (Moderate significance)	Henhurst cottages will remain as a small hamlet within a rural setting however landscape character will change from an arable landscape to grassland with young planting. NEUTRAL IMPACT (Moderate-high significance)	Henhurst cottages will remain as a small hamlet within a rural setting however landscape character will change from an arable to a wooded and grassland landscape with amenity uses. NEUTRAL IMPACT (High significance)
Henhurst	Education	No existing facilities	Low (if present)	No significant change – implementation period Low – Year 0 Low – Year 40	NO SIGNIFICANT IMPACT	Local people could benefit from informal education through community involvement and Forestry Commission initiatives POSITIVE IMPACT (Low significance)	Local people could benefit from informal education through community involvement and Forestry Commission initiatives POSITIVE IMPACT (Low significance)
Henhurst	Views	Likely views east from the first storey over Henhurst Road, hedgerows to Winstead Hill. Partial views southwest over gardens to western field of the site and probable long distance views from upper stories to Meopham.	High	Low - Implementation phase Low – year 0 Moderate – year 40	Activities visible in close- and middle distance associated with planting, seeding works and construction of paths. Glimpses of the digging out of the pond to the north and south. Construction traffic will not pass the fronts of the cottages but will be visible to the north-west. NEGATIVE IMPACT (Moderate significance)	Views will retain open character similar to existing in character and quality. Until the planting is well-established (yr 5-8) young planting will appear insubstantial and may give the site a neglected appearance. NEUTRAL IMPACT (Moderate significance)	Close views will remain similar to existing with more planting features and detail to be seen. Mature woodland and coppice is likely to restrict views immediately west. The established woodland blocks at Jeskyns Wood will screen any views to the A2 corridor and will merge into the existing horizon of Shorne woods Generally, agricultural character of views will be diminished and views to the south and east will include more features but will retain some openness and views to the north and north-east will be more wooded. NEUTRAL IMPACT (Moderate-high significance)
Henhurst	Recreation	No existing facilities	Moderate (if present)	No significant change – implementation period	NO SIGNIFICANT IMPACT	Opportunities for recreation will increase through the	Opportunities for recreation will increase

Appendix 6 Population Impact Schedule

Location	Type of feature, facility or characteristic	Nature of existing feature, facility or characteristic	Value of feature, facility or characteristic	Magnitude of change	Impact during implementation period (significance)	Impact after completion at year 0 (significance)	Impact after completion at year 40 (significance)
				Moderate – Year 0 Moderate – Year 40		organisation of more local events held at the site and through improved accessibility to the countryside and increased provision of open space accessible to the public. Potential indirect positive impact on the health and fitness of the local population through improved provision of recreation facilities POSITIVE IMPACT (Moderate significance)	through the organisation of more local events held at the site and through improved accessibility to the countryside and increased provision of open space accessible to the public POSITIVE IMPACT (Moderate significance)
Henhurst	Accessibility to the countryside	Good provision of public footpaths but no bridleways and no provision for disabled or elderly users	Moderate	No significant change – implementation period High – Year 0 High – Year 40	NO SIGNIFICANT IMPACT	Improved pathways and the provision of new horse trails and accessible trails will improve current levels of accessibility. Potential indirect positive impact on the health and fitness of the local population through improved provision of facilities POSITIVE IMPACT (Moderate-high significance)	Improved pathways and the provision of new horse trails and accessible trails will improve current levels of accessibility. POSITIVE IMPACT (Moderate-high significance)
Henhurst	Security	No significant problems currently.	High	No significant change – implementation period Low – Year 0 Low – Year 40	NO SIGNIFICANT IMPACT	Some increased risk to properties due to the increased activity in the area however this has been mitigated by buffer planting. Until planting has established, security concerns may be slightly higher. The careful siting of the car park encourages maximum natural surveillance. In addition, formal wardening will have a positive impact upon security levels Increased activity on the site will provide natural	Some increased risk to properties due to the increased activity in the area however this has been mitigated by buffer planting. The careful siting of the car park encourages maximum natural surveillance. In addition, formal wardening will have a positive impact upon security levels Increased activity on the site will provide natural surveillance and will increase personal security

						surveillance and will increase personal security upon the site. NEUTRAL IMPACT (Moderate significance)	upon the site. NEUTRAL IMPACT (Moderate significance)
Henhurst	Traffic	Henhurst Road currently connects the A2 truck road to settlements to the south of the transport corridor. 2-lane road edged with young hedgerows.	Moderate	Low – implementation period Low – Year 0 Low – Year 40	Construction access will be located approximately 250m (straight line distance) from the northern-most cottage in Henhurst which may occasionally cause backing up of traffic when trucks are accessing the car park (on average, 5 times daily) NEGATIVE IMPACT (Low significance)	Increased visitor numbers will not have any significant impact upon existing congestion, pollution, noise or environmental conditions. NO SIGNIFICANT IMPACT	Increased visitor numbers will not have any significant impact upon existing congestion, pollution, noise or environmental conditions. NO SIGNIFICANT IMPACT
Henhurst	Ecological interest	Low ecological interest	Moderate	No significant change – implementation period Low – Year 0 High – Year 40	NO SIGNIFICANT IMPACT	Ecological interest of site will gradually increase as the site matures. POSITIVE IMPACT (Low-moderate significance)	Significant increase in ecological interest of site provided by mature woodland, grassland and orchard habitats provides an amenity for local residents. POSITIVE IMPACT (Moderate-high significance)
Properties along Jeskyns Road	Setting	Open, agricultural landscape with large fields and few features	High	Low – implementation period Moderate – Year 0 High – Year 40	Implementation works will be similar in character and scale as the existing agricultural activities NEUTRAL IMPACT (Moderate significance)	Properties will retain a rural setting however landscape character will change from an arable landscape to grassland with young planting. NEUTRAL IMPACT (Moderate-high significance)	Properties will retain a rural setting however landscape character will change from an arable to a wooded and grassland landscape with amenity uses. NEUTRAL IMPACT (High significance)
Properties along Jeskyns Road	Education	No existing facilities	Low (if present)	No significant change – implementation period Low – Year 0 Low – Year 40	NO SIGNIFICANT IMPACT	Local people could benefit from informal education through community involvement and Forestry Commission initiatives POSITIVE IMPACT (Low significance)	Local people could benefit from informal education through community involvement and Forestry Commission initiatives POSITIVE IMPACT (Low significance)
Properties along Jeskyns Road	Views	Open views and partly screened views of the surrounding landscape	High	Variable, but generally: Low - implementation period Moderate – Year 0	Activities generally partly visible in close- and middle distance associated with planting, seeding works and	New planting and pathways will be visible and agricultural character of views will be diminished.	The growth of new tree and orchard planting to the south of Jeskyns road will dominate the

Appendix 6 Population Impact Schedule

Location	Type of feature, facility or characteristic	Nature of existing feature, facility or characteristic	Value of feature, facility or characteristic	Magnitude of change	Impact during implementation period (significance)	Impact after completion at year 0 (significance)	Impact after completion at year 40 (significance)
Round Street	Setting	Open, agricultural landscape with medium-scale fields and orchards but few features	High	Low – implementation period Moderate – Year 0 High – Year 40	Implementation works will be similar in character and scale as the existing agricultural activities NEUTRAL IMPACT (Moderate significance)	Round Street will remain as a small hamlet within a rural setting however landscape character will change from an arable landscape to grassland with young orchard and woodland planting. NEUTRAL IMPACT (Moderate-high significance)	Round Street will remain as a small hamlet within a rural setting however landscape character will change from an arable to a mix of orchard, woodland and grassland with amenity uses. NEUTRAL IMPACT (High significance)
Round Street	Education	No existing facilities	Low (if present)	No significant change – implementation period Low – Year 0 Low – Year 40	NO SIGNIFICANT IMPACT	Local people could benefit from informal education through community involvement and Forestry Commission initiatives POSITIVE IMPACT (Low significance)	Local people could benefit from informal education through community involvement and Forestry Commission initiatives POSITIVE IMPACT (Low significance)
Round Street	Views	Variable but generally restricted views to the north from upper stories over paddocks and private land towards agricultural land.	Moderate	Variable, but generally: No significant change - Implementation phase No significant change – year 0 Moderate– year 40	It is possible that construction works including the laying of pathways, planting and seeding could be glimpsed from upper stories and gardens however the nature and scale of the works are not significantly different to agricultural practices recently experienced upon the site. NO SIGNIFICANT IMPACT	The impact of the scheme at this stage will be negligible due to partial views and unestablished vegetation. The quality and character of the views will remain largely unchanged. NO SIGNIFICANT IMPACT	The established vegetation is likely to provide a greater sense of depth to the boundary treatment and sense of enclosure. Partial views through tall planting will be possible across wildflower meadows. In addition, electrical pylons are unlikely to dominate the landscape to the same extent POSITIVE IMPACT (Moderate significance)
Round Street	Recreation	No existing facilities	Moderate (if present)	No significant change – implementation period Moderate – Year 0 Moderate – Year 40	NO SIGNIFICANT IMPACT	Opportunities for recreation will increase through the organisation of more local events held at the site and through improved accessibility to the countryside and increased provision of open space accessible to the public. Potential indirect positive impact on the health and fitness of the local population through improved provision of recreation facilities	Opportunities for recreation will increase through the organisation of more local events held at the site and through improved accessibility to the countryside and increased provision of open space accessible to the public Potential indirect positive impact on the health and fitness of the local population through improved provision of
