Source: Forestry Commission, grant schemes

Notes:

1. New planting and restocking figures come from Forestry Commission administrative systems.
2. FC = Forestry Commission; Private sector = All other woodland, including some other publicly owned woodland.
3. Private sector figures are based on areas for which grants were paid during the year. Figures for grant-aided planting under Rural Development Contracts in Scotland relate to calendar years.
4. Estimates of areas planted without grant aid are also included (where possible) up to 2009-10, but no estimates are available since then. As a result, the reported figures are likely to under-estimate the true level of planting activity.
5. The planting season lies both sides of 31 March, and the weather can cause planting to be advanced or delayed.
6. Includes woodland formed by natural colonisation.

Source: Forestry Commission, grant schemes

Notes:

1. New planting and restocking figures come from Forestry Commission administrative systems.
2. FC = Forestry Commission; Private sector = All other woodland, including some other publicly owned woodland.
3. Private sector figures are based on areas for which grants were paid during the year. Figures for grant-aided planting under Rural Development Contracts in Scotland relate to calendar years.
4. Estimates of areas planted without grant aid are also included (where possible) up to 2009-10, but no estimates are available since then. As a result, the reported figures are likely to under-estimate the true level of planting activity.
5. The planting season lies both sides of 31 March, and the weather can cause planting to be advanced or delayed.
6. Includes woodland restocked by natural regeneration.
7. Natural regeneration of broadleaves in non-clearfell systems is likely to be under-reported in this table.

Source: Forestry Commission, Natural Resources Wales, grant schemes

Notes:

1. New planting and restocking figures come from FC/NRW administrative systems.
2. FC = Forestry Commission; NRW = Natural Resources Wales (from April 2013); Private sector = All other woodland, including some other publicly owned woodland.
3. Private sector figures are based on areas for which grants were paid during the year and, for England, includes new planting supported by the Woodland Trust. Figures for grant-aided planting under Rural Development Contracts in Scotland relate to calendar years.
4. Estimates of areas planted without grant aid are also included (where possible) up to 2009-10, but no estimates are available since then. As a result, the reported figures are likely to under-estimate the true level of planting activity.
5. The planting season lies both sides of 31 March, and the weather can cause planting to be advanced or delayed.
6. Includes woodland formed by natural colonisation.

Notes:

1. New planting and restocking figures come from FC/NRW administrative systems.
2. FC = Forestry Commission; NRW = Natural Resources Wales (from April 2013); Private sector = All other woodland, including some other publicly owned woodland.
3. Private sector figures are based on areas for which grants were paid during the year and, for England, includes new planting supported by the Woodland Trust. Figures for grant-aided planting under Rural Development Contracts in Scotland relate to calendar years.
4. Estimates of areas planted without grant aid are also included (where possible) up to 2009-10, but no estimates are available since then. As a result, the reported figures are likely to under-estimate the true level of planting activity.
5. The planting season lies both sides of 31 March, and the weather can cause planting to be advanced or delayed.
6. Includes woodland formed by natural colonisation/regeneration.
7. Natural regeneration of broadleaves in non-clearfell systems is likely to be under-reported in this table.

Publication date: 16 June 2016

1. New planting and restocking figures come from FC/NRW/FS administrative systems.
2. FC = Forestry Commission; NRW = Natural Resources Wales (from April 2013); FS = Forest Service; Private sector = All other woodland, including some other publicly owned woodland.
3. Private sector figures are based on areas for which grants were paid during the year and, for England, includes new planting supported by the Woodland Trust. Figures for grant-aided planting under Rural Development Contracts in Scotland relate to calendar years.
4. Estimates of areas planted without grant aid are also included (where possible) up to 2009-10, but no estimates are available since then. As a result, the reported figures are likely to under-estimate the true level of planting activity.
5. The planting season lies both sides of 31 March, and the weather can cause planting to be advanced or delayed.
6. Includes woodland formed by natural colonisation/regeneration.
7. Natural regeneration of broadleaves in non-clearfell systems is likely to be under-reported in this table.
