Seed explorer

Get into the woods and look
for nuts, cones and seeds

Be a squirrel!

Collect and bury three nuts
like a squirrel, then see if
you can find them later!

Conker

Acorn

Pine cone

Look for and
touch these!

Hidden seeds

Find an open cone
and see if you can
shake out any
winged seeds!

Make a seed trail

Leave a trail of seeds for a
vole to follow. Where will you
lead them: to a waiting store
of nuts, to a new burrow,
or somewhere else?

Look for a
rainbow of
seed colours
as you walk!

Find a nibbled cone
and discover what
has eaten it:

Can
you
find?

Squirrel: Scales are gnawed
off, eaten cones look untidy
and are left in open spaces.

Mouse: Scales are neatly
gnawed off, found at
hidden feeding sites.

Woodpecker: Scales
broken and ruffled.

This pine cone has been
eaten by a squirrel
