Please return (preferably by e-mail) to Timber Section no later than 31 October 2013.

By e-mail to stats.timber@unece.org. By fax to +41 22 917 0041

Questions? Please contact Anvar Nigmatov at the above address or telephone +41 22 917 2880.

The historical data are from the most recent Joint Forest Sector Questionnaire (blank) or the Timber Committee Forecast (#). For explanations please see These data are flagged with E, R, N or C for secretariat estimate, repeat, national estimate or calculated totals (from subitems). If there is no flag, this indicates officially supplied data.

Notes:

The term "ex" means that there is not a complete correlation between the two codes and that only a part of the HS2002/HS2007/HS2012 or SITC Rev.3 code is applicable.

For instance "ex 440399" under product 1.2.NC.T means that only a part of HS2002/HS2007/HS2012 code 440399 refers to tropical industrial roundwood. Many tropical timber products contain "ex" codes in the above list as the Harmonized System of customs classification explicitly recognizes less than 100 tropical timber species. Species not explicitly recognized as tropical in the HS are grouped in "others" categories with non-tropical, non-coniferous timbers that are likewise not explicitly recognized by the HS (e.g. 440799). Estimates of tropical timber trade totals therefore require that these "others" categories be analyzed to ascertain how much of the total was sourced from tropical countries.

In HS2002/HS2007/HS2012, 0 in the final (fourth or sixth) position means that all sub-headings are included: 440830 includes 440831 and 440839.

In SITC Rev.3, if only 4 digits are shown, then all sub-headings at lower degrees of aggregation are included: 634.1 includes 634.11 and 634.12
