

THE PLANT CENTRE

Westonbirt The National Arboretum

This Plantsman's paradise is to be found hidden within old stone walls in the valley between the Old Arboretum and Silk Wood. We specialise in hardy plants and depending on the season, stock an extensive and interesting selection of Japanese maples, unusual trees, shrubs and conifers, as well as climbing plants, herbaceous perennials, hardy ferns, grasses and shrub roses.

SUMMER 2011

Australian Goodies

For the second year running, we have a plant bed dedicated to plants from Australia. Among the Antipodian offerings are *Grevillea*, *Correa* (Australian Fuchsia) and the increasingly popular Wollemi Pine. Many are not usually found for sale and as well as great garden plants they can also make fantastic pot plants which can be grown in a conservatory. Add to that, our very own Aussie member of staff and you have all the expertise you could ever need.

Harvest Time

There is something very satisfying in picking the product of your garden labours and placing it in a wooden trug. We sell 3 different sizes of trug at the Plant Centre, the smallest priced at £8, the medium at £12 and the largest at £15. But if you buy all 3 sizes together for £27, you will save on the price of the smallest. Bargain of the summer!

Our trugs have also proved very popular with those who like to gather seed, mushrooms and plant cuttings.

Grevillea rosmarinifolia

WESTONBIRT CHARCOAL

We stock this excellent, environmentally friendly charcoal, this is produced by the Westonbirt coppicers as part of our sustainable woodland management.

We are open daily from 10am-5pm and can be visited without entry to the Arboretum. We have our own large car park, just turn left at the mini island before the arboretum admissions hut
